# Making the Flusko dashboard show the minute tab

This is a description based on an FLM v2A, firmware revision 232

Selecting the minute dash in the Flukso website due to „mixed content" (secure/https and local/http) leads to an error preventing that the dash is shown correctly.

Using Firefox 31: As can be seen in the screenshot, there is a little shield symbol left to the address line; pressing on this shield opens a window and asks what to do.

Choosing the „deactivate protection" option makes the minute dash work…
